

HECKINGTON PARISH COUNCIL RISK REGISTER

The management of risk is an important part of the parish council's work: To ensure that our staff and the public are safe and our assets are protected. Risk assessment is a systematic examination of everything that we do to help us to identify and mitigate potential risks. The parish council based on this assessment will take all reasonable steps to reduce or eliminate risk insofar as is reasonably practicable.

The risk register uses a traffic light system to rate each risk.

Colour coding:

-  This risk is being effectively managed with adequate reviews, processes and/or documentation as appropriate.
 -  This risk is being managed. However, there are other risk management actions that could be undertaken to reduce the risk further. If actions are achieved this could be altered to the lowest risk rating
- Or
- This identified risk is not being adequately managed but if the risk is realised it will have minimal impact on Council. Mitigation strategies need to be appropriate to the likelihood of risk and harm caused if it were realised.
-  This risk would have a serious potential impact on Council. Management of the risk is inadequate and should be monitored by the F&P committee until it is appropriately managed or mitigated. Council may maintain a red status risk if it is of low probability or beyond any measures that Council can put in place.
